

Fresh Picks

Santa came a bit early! 🧑🏻‍🎅 📺

Thanks to a generous gift from the RRAF Organization, GROW will soon be installing a four-tier vertical hydroponic growing system. Hydroponically grown plants thrive without soil, using a mineral-rich water solution to deliver nutrients directly to the roots.

This exciting addition will allow GROW to offer winter programming for our Core Crew members. We'll be focusing on growing fresh greens and herbs, which will be sold to local vendors and restaurants.

We've also been lucky to partner with students from Metro High School throughout the process. These students researched system options, helped select our equipment, and even recommended what GROW should grow and sell. In early January, they'll roll up their sleeves and help construct the system!

Fresh greens anyone? 🌿 ✨
