

Pardon Our Dust... Big Things Are Growing

Big things are rolling into GROW! After faithfully serving since early on ... our driveway is getting a long-overdue makeover of orchard-sized proportions 🚜 This investment helps create safer, smoother access for our Core Crew, volunteers, and visitors as GROW continues to grow.

Because of construction, GROW will be closed to the public for approximately the next five weeks as we pave the way for future growth.

Dust, detours, and big progress ahead...

Garden Ready

Loofah Gourd

Building on the lessons learned during our 2025 garden pilot, including weed suppression, irrigation, and crop selection, GROW's garden is off and growing in 2026.

This summer, we are growing a variety of garden favorites:

Green Beans • Cucumbers • Onions • Spaghetti Squash •
Tomatoes • and, of course, Strawberries

We are also piloting loofah gourds, a fun and unique addition to the garden. Once harvested and dried, loofahs can be used for cleaning and household tasks. This creative idea was shared by GROW HUB, our sister organization in Florida.

Watch Facebook and our website for product availability and details on where and when to shop.

Metro High School students helped with planting, including pumpkins and gourds they grew from seed through their science curriculum.

Grow: Growing Real Opportunities for Work

GROW is a non-profit that empowers individuals living with challenges by providing valuable employment skills through meaningful work in horticulture.
